

High Performance Filters for High Current Three Phase Applications

ADT Series

UL Recognized

ADT6/ADT6S

ADT Series

Designed with very high insertion loss for Delta applications, these three phase filters work well in industrial applications to bring high current motor drives into compliance with the European EMC Directives.

The series offers filters between 63 and 200 amps at 480 VAC phase-to-phase. It is available with common or differential mode (S models) coils for the correct protection to fit the application.
